CAPIOX® SX Family of Oxygenators

Terumo's line of high-performance CAPIOX® SX oxygenators are available in multiple sizes to accommodate every patient. Able to meet the requirements of small to large patients, this family of oxygenators offers low priming options and high gas exchange. Proven performance features, including Terumo's exclusive biopassive surface coating, make these highly efficient oxygenators the right choice for the perfusionist and the patient.

Oxygenator

- Terumo's exclusive hollow fiber technology is used in every CAPIOX® SX oxygenator.
- Unique fiber bundle design creates a uniform blood flow, resulting in consistently high gas exchange.
- Superior quality control assures consistent oxygenator performance.

Xcoating™ Surface Coating

- This amphiphilic surface coating has both hydrophobic and hydrophilic properties which reduce platelet adhesion and minimize platelet activation.
- Non-heparin based biopassive polymer does not react with blood components.
- Adheres to all surfaces and has no contraindications for patient size.

Reservoir

- Separate cardiotomy and venous filters improve handling of venous blood and minimize defoamer contact.
- Flat front enhances visibility and allows for easy mounting of level sensor pads.
- Tapered design aids low level volume assessment.
- Volume scales are easily visible on three sides, even at low volume levels.
- Short breakthrough time permits quick and easy priming.
- Integrated positive pressure relief for vacuum assisted venous drainage (SX18/SX25).*
- Detachable hardshell reservoir for additional setup options.

Heat Exchanger

- Efficient heat exchange produced by hundreds of stainless steel pipes facilitates the uniform circulation of water through the heat exchanger compartment.
- Designed specifically to reduce cooling and rewarming times.
- *Non-compliant* heat exchanger design does not expand and contract, regardless of temperature and pressure changes.

CAPIOX® SX10 Oxygenator

Specially designed to meet the needs of smaller patients.

- Priming volume of 135 mL
- Blood flow rate of up to 4.0 L/min
- Reservoir capacity of 3,000 mL; 70 mL minimum operating level

CAPIOX® SX18 Oxygenator

Compact oxygenator for a wide range of patient sizes.

- Priming volume of 270 mL
- Large blood flow rate of up to 7.0 L/min
- Large reservoir capacity of 4,000 mL; 200 mL minimum operating level
