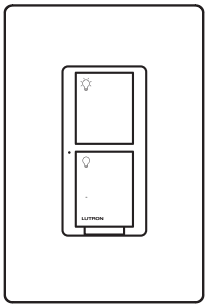
369987c 1 09.12.18

Caséta® Wireless Load Controls

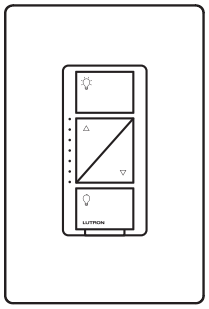
The Caséta® Wireless family of Dimmers and Switches can be controlled directly and remotely when paired with Pico® Remote Controls providing a system that delivers convenience and ease of installation.

Caséta® Wireless Dimmers and Switches use Lutron® patented Clear Connect® RF Technology which enables wireless communication with Pico® Remote Controls and the Lutron® Smart Bridge and Smart Bridge PRO.

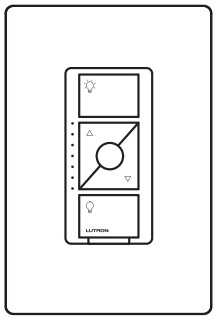
Caséta® Wireless
In-Wall Switches



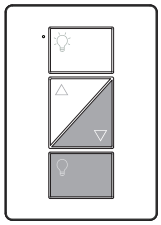
Caséta® Wireless
In-Wall Dimmers



Caséta® Wireless
ELV+ Dimmer



Caséta® Wireless
Plug-In Lamp Dimmer



Features

- Works with Pico® Remote Control
- Works with the Lutron® App (via a Smart Bridge or Smart Bridge PRO)[1]
- Lutron® patented Clear Connect® RF Technology works through walls and floors
- Includes Front Accessible Service Switch (FASS™) for safe lamp replacement
- Works with Lutron® Radio Powr Savr™ Occupancy and Vacancy Sensors in standalone applications (sensors do not work with Smart Bridge or Smart Bridge PRO)

Note: Certain models or load types will require a neutral connection (see Load Types and Capacity sections).

[1] The Lutron® App is required for setup and usage with the Smart Bridge and Smart Bridge PRO. The Lutron® App is compatible with iOS® devices version 8.0 or later and Android™ devices 4.0 or later.

Job Name:	Model Numbers:	
Job Number:		

Specifications

Regulatory Approvals

- cULus Listed
- NOM Certified
- FCC Approved. Complies with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules
- Industry Canada Certified
- IFTEL Certified
- NEMA 410 (-5ANS, -6ANS, -5WS, -10NXD, -5NE)

Power

Operating voltage:

- 120 V~ 50/60 Hz: -3PCL, -6WCL, -10NXD, -6ANS, -5ANS, -5NE
- 120/277 V~ 50/60 Hz: -5WS-DV

Key Design Features

- Tested to withstand electrostatic discharge without damage or memory loss, in accordance with IEC 61000-4-2.
- Tested to withstand surge voltages without damage or loss of operation, in accordance with IEEE C62.41-1991 Recommended Practice on Surge Voltages in Low-Voltage AC Power Circuits.
- Load controls always operate locally and do not require system control.
- Power failure memory: should power be interrupted, the control will return to its previously set level prior to the interruption when power is restored.
- PD-5WS-DV, PD-5ANS, PD-6ANS, and PD-10NXD use conventional 3-way wiring.
- Uses Lutron® Claro® Wallplates or designer-style wallplates from other manufacturers. Wallplates are sold separately.
- Lutron® Claro® Wallplates snap on with no visible means of attachment.
- Requires a 1-gang U.S. wallbox. 3½ in (89 mm) depth recommended, 2¼ in (57 mm) depth minimum.
- Green status LED(s) to indicate load status.

System Communications and Capacity

- Caséta® Wireless In-Wall Switches and Dimmers communicate with Pico® remote controls and the Lutron® Smart Bridge/Smart Bridge PRO through Radio Frequency (RF).
- The Caséta® Wireless In-Wall Switches and Dimmers communicate with Lutron® Radio Powr Savr™ Occupancy and Vacancy Sensors in a standalone application. Sensors do not work with Smart Bridge or Smart Bridge PRO.
- The Caséta® Wireless In-Wall Switches and Dimmers must be located within 60 ft (18 m) line-of-sight or 30 ft (9 m) through walls, of Pico® remote controls and Lutron® Smart Bridge devices.

Device limits

- Pico® Remote Controls and Radio Powr Savr™ Occupancy Sensors: up to 10 devices (total) may be paired to each Caséta® Wireless In-Wall Switch/ Dimmer (with no Smart Bridge installed).
- Smart Bridge or Smart Bridge PRO system: up to 50 total wireless devices (Caséta® Wireless Dimmers/ Switches, Pico® Remote Controls, and Shades) are supported per system. Smart Bridge or Smart Bridge PRO counts as one device.

Environment

- Ambient operating temperature: 32 °F to 104 °F (0 °C to 40 °C), 0% to 90% humidity, non-condensing. Indoor use only.
- PD-5WS-DV, PD-5ANS, PD-6ANS, and PD-10NXD can be used with mechanical switch in 3-way applications.

			Fluorescent	1 ballast	6 A	6 A	5 A
			ELV	10 W	720 W	720 W	600 W
			PHPM-SW	1 interface	3 interfaces	3 interfaces	3 interfaces

1 No neutral wire required.

2 To ensure proper operation of the switch with LED, fluorescent, and ELV loads, a LUT-MLC (included) may be required, especially at lower wattages. If the status LED on the switch is flashing or solid red in color, a LUT-MLC must be installed. To guarantee best performance, installing a LUT-MLC with these load types regardless of wattage is recommended. Rarely, some load types may still flicker or glow in the off state even with the LUT-MLC installed, in which case a different load may be required or more than one LUT-MLC is required.

3 See “Ganging and Derating” section.

Load Type and Capacity - Dimmers

Model Number	Description	Voltage	Load Type	Minimum Load	Maximum Load		
					Not Ganged	End of Gang	Middle of Gang

1 Cannot be ganged.

2 Need to change load type to MLV. See www.casetawireless.com/change_phase

3 See bulb list at www.lutron.com/led

4 For PD-10NXD, a neutral connection is required for MLV loads, LED drivers, dimmable ballasts, and power modules (PHPM-PA, PHPM-3F, and GRX-TVI).

5 Compatible dimmable ballasts include Tu-Wire®, Mark X, and PowerSense®.

6 These loads are best operated using a forward-phase control. Consult www.casetawireless.com/bulblist to ensure the appropriate phase for bulb models used.

7 SSL7 compliant when in forward-phase.

8 Canadian packaged product.

9 Available in WH only.

10 Kit model number. Kit includes (1) PD-3PCL-WH, and (1) PJ2-3BRL-WH-L01R (3-button with raise/lower Pico® wireless control in White).

11 Kit model number. Kit includes (1) L-BDG2-WH (Caséta® Wireless Smart Bridge with HomeKit technology), (1) PD-3PCL-WH, (1) PJ2-3BRL-WH-L01R (3-button with raise/lower Pico® wireless control in White) and (1) L-PED1-WH (Single tabletop pedestal in White).

12 Kit model number. Kit includes (1) PD-6WCL-WH, (1) PJ2-3BRL-WH-L01R (3-button with raise/lower Pico® wireless control in White), and (1) CW-1-WH (single-gang faceplate in White).

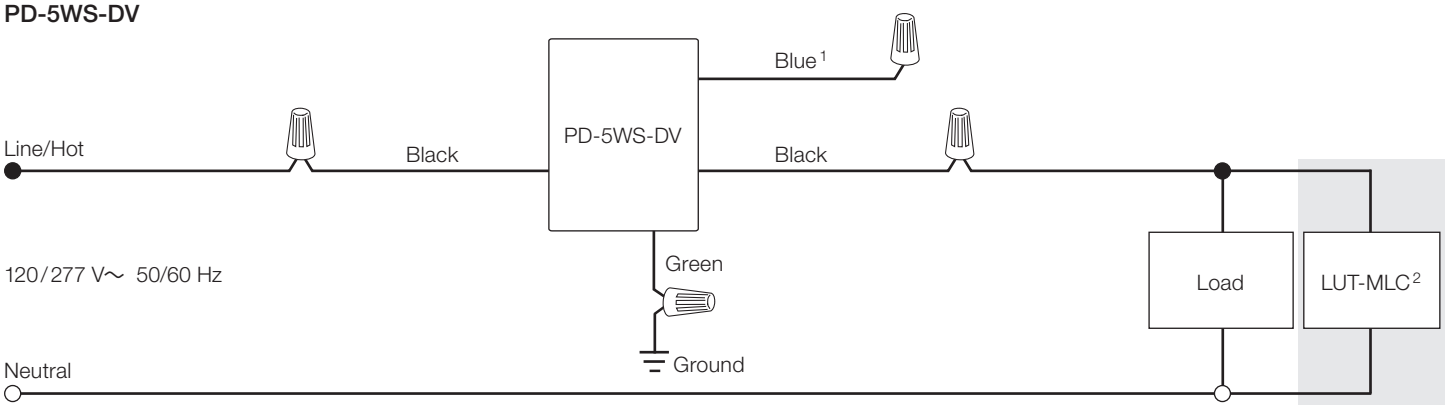
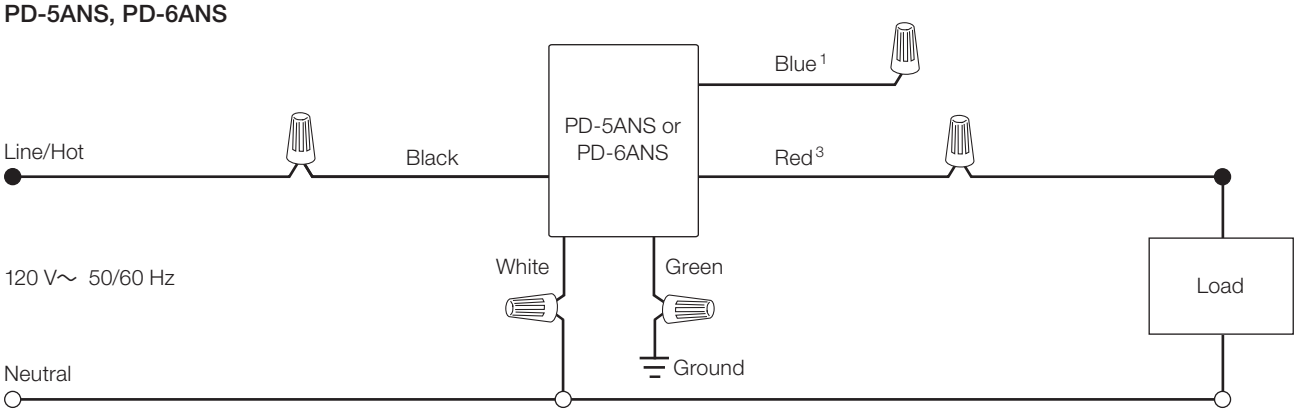
Wiring Diagrams - Switches

Single Location Installation

PD-5WS-DV



PD-5ANS, PD-6ANS



1 When using controls without a mechanical 3-way switch, cap the blue terminal. **Do not** connect the blue wire to any other wiring or to ground.

2 A LUT-MLC ensures proper function when LED, fluorescent, or ELV loads are used. Install the LUT-MLC inside a load fixture or in a separate junction box within the circuit.

3 The red wire must be connected to the load and the black wire must be connected to Line/Hot. The switch will not work if the wires are reversed.
