The Engineering Services Department's Stormwater Management Division is responsible for services, programs, and projects that reduce pollution in Raleigh's waterways and address critical flooding and erosion issues that impact streets and private properties in order to preserve and protect life, support healthy natural resources, and complement sustainable growth for the Raleigh community. The Stormwater Utility Fee provides dedicated funds to administer and pay for needed and approved stormwater management capital improvement projects throughout the city, manage and maintain the public stormwater system, and meet or exceed state and federal regulatory requirements.

The Stormwater Utility rates are determined by stormwater service levels and requirements for the Raleigh community and are reviewed annually during the budget process. For FY23, the single-family equivalent unit (SFEU) will increase by \$0.18 per unit or 2.5%. Tiered rates will also increase based upon the SFEU increase.

Fees listed under Specific Fees Enumerated are indexed on an annual basis using the Consumer Price Index (CPI). This year's CPI rate is 2.5%. The rate is modified based on personnel and benefits.

## II. Fire Department

**Email:** fireprevention@raleighnc.gov

**Phone:** 919-996-6392

The Office of the Fire Marshal is the enforcement, educational, and informational arm of the Raleigh Fire Department. The division performs site inspections, issues permits, enforces fire codes, and coordinates pre-fire planning for buildings and facilities within the city. The division is also responsible for conducting fire investigations to determine origin and cause of all fires and provides public fire education to the citizens of Raleigh.

Fees associated with fire prevention and permits are indexed on an annual basis using the Consumer Price Index (CPI). This year's CPI rate is 2.5%. The rate is modified based on personnel and benefit increases. Fees outlined below have been updated to include the annual increase for FY23.

In FY23 the addition of a non-emergent lift assist at skilled nursing facilities, assisting living, and independent living facilities has been added.

FIRE MARSHAL				
Construction Permits				
	Fee Description	FY22	FY23	Unit of Measure
Alternative Fire Extinguishing Systems (Inert Gas)	Installation of or modification to a gas type automatic fire-extinguishing system. Examples: Clean Agent, Carbon Dioxide, FM 200, etc.	\$181.00	\$186.00	per system
Alternative Fire Extinguishing Systems (Hoods)	Installation of or modification to an automatic fire extinguishing system.	\$181.00	\$186.00	per system
Battery systems	Installation of battery of systems with liquid capacity in excess of 50 Gallons	\$181.00	\$186.00	per system
Compressed gases	Where the compressed gases in use or storage exceed the amounts listed in the NC Fire Code 105.6.9, a construction permit is required to install, repair damage to, abandon, remove, place temporarily out of service or close or substantially modify a compressed gas system.	\$181.00	\$186.00	per compressed gas system
Cryogenic Fluids	Installation of or alteration to outdoor cryogenic fluid storage systems in excess of the limits of the NC Fire Code (See table 105.6.11)	\$181.00	\$186.00	per cryogenic fluid system
Emergency responder radio coverage system	Installation of or modification to emergency responder radio coverage system(s)	\$119.00	\$122.00	per system
Rate Description	Per square foot after shop draws are reviewed	\$0.017	\$0.020	per sq.ft. after shop draws are reviewed
Fire Alarm & Detection System	Installation of or modification to fire alarm and detection systems and related equipment.	\$0.017	\$0.017	per sq.ft. gross floor area for each system

Fire Hydrants - Private	Installation or modification of private fire hydrants.	\$181.00	\$186.00	per private hydrant system

Hazardous Materials	As regulated by the NC State Fire Code (See Table 105.6.20)	\$90.00	\$92.00	per hazardous materials facility or operation
Industrial Ovens	For the operation of industrial ovens	\$90.00	\$92.00	per operation with Industrial oven(s)
Non-Emergent Lift Assist	For non-emergent list assists at skilled nursing facilities, assisted living, and independent living facilities; first offense		\$200.00	per assist
Rate Description	Second offense		\$350.00	per assist
Rate Description	Third offense		\$500.00	per assist
Temporary Sleeping Units for Disaster Workers	Temporary sleeping units for disaster relief workers		\$90.00	per event

# III. Office of Emergency Management and Special Events

**Email:** [hospitality.programs@raleighnc.gov](mailto:hospitality.programs@raleighnc.gov)

**Phone:** 919-996-2200

The Office of Emergency Management and Special Events establishes and maintains a strategic framework to efficiently guide and coordinate City resources while collaborating with external partners throughout emergencies and special events. The office also oversees the private use of public space, acting as a liaison to the nightlife industry to ensure a more vibrant and safe community.

The Outdoor Seating Program has expanded and created two separate permits to better describe the use: Sidewalk Seating and Streeterly. Sidewalk Seating and Streeterly fees have been waived for FY23.

The Amplified Entertainment Permit and Hospitality District Entertainment Permit are being managed by the Office of Emergency Management and Special Events starting in FY23. Renewal fees associated with Amplified Entertainment Permits, which were waived during the height of the COVID-19 pandemic, will be reinstated in FY23. This year's CPI rate is 2.5%. The rate is modified based on personnel and benefit increases.

OFFICE OF EMERGENCY MANAGEMENT & SPECIAL EVENTS

# IV. Parks, Recreation, and Cultural Resources

**Email:** prcontact@raleighnc.gov

**Phone:** 919-996-3285

The Parks, Recreation and Cultural Resources Department oversees 118 miles of greenway trails, approximately 10,000 acres of land with more than 200 parks. Park amenities include amusements, art centers, athletic facilities, community centers, lakes, nature preserves, off-leash dog parks, playgrounds, swimming pools, historic sites, and open spaces.

Proposed fee changes for FY23 include new fees for Dix Park shelter rentals and Pullen Art Center gallery. Based on a market review fees are proposed to increased in aquatics, Walnut Creek Athletic Park gate fees and Cemetery lot fees.

Fees associated with urban forestry, facility fees, and fees in lieu are indexed on an annual basis using the Consumer Price Index (CPI) and the Engineering News-Record (ENR). This year's CPI rate is 2.5%. The rate is modified based on personnel and benefits. The ENR annual change is 5.83%. The tree permit fees are indexed based on CPI.

In addition to facility based fees, PRCR develops fees for programming. These fees are updated and approved according to the Department's cost recovery matrix.

## Open Space Fees

The fee for residential development only is based on the number of dwelling units using the established rate for the zone in which the payment is applied.

“Single Family Dwelling” is defined as a single-family detached dwelling unit. “Multi-Family Dwelling” is defined as any building which contains two or more dwelling units.

# V. Planning and Development

**Email:** [planning@raleighnc.gov](mailto:planning@raleighnc.gov)

**Phone:** 919-996-2682

The Planning and Development Services Department performs full project review and inspections for all private development within Raleigh to promote and ensure quality, safety, usability, sustainability and compliance in the built environment. Planning provides three main services: comprehensive planning, design and implementation, and regulation.

A new fee for reinspection is recommended at the minimum permit level to cover return trips to review work that previously failed an inspection. Additionally, to simplify the fee schedule, fees designated as having a minimum permit rate have been combined into an appendix for greater detail and is documented on one single line, referenced as minimum permit fee.

Development fees are reviewed annually in accordance with the Development Services User Fee Policy adopted by Council in June of 2017. Per the policy, two-thirds of the fees are indexed based on a Consumer Price Index (CPI) and the remaining third are reviewed to ensure the time and effort to provide the services is aligned with both the recovery of operating costs and prevailing market factors. For FY23, Planning and Development fees are indexed using Consumer Price Index (CPI). This year's CPI rate is 2.5%. The rate is modified based on personnel and benefit increases.

## Alternative Thoroughfare and Collector Street Fee Calculation

---

In the event that fee payers believe that the attributable costs for improving the thoroughfare system to serve their new construction is less than the thoroughfare and collector street fee schedule, the fee payer may submit an alternative fee calculation to the Planning and Development Customer Service Center based upon the following:

<b>Facility Fee =</b>	$(ADT) \times (\% \text{ New Trips}) \times (\text{Trip Length}) \times (\text{Cost/VMT})$
<b>Where: ADT =</b>	The number of average daily trip ends of the new construction
<b>% New Trips =</b>	The obstruction of a sidewalk such that no access is provided to the existing sidewalk for general pedestrian traffic.
<b>Trip Length =</b>	The percent of new trips added to the thoroughfare and collector system roadways. The percentage is 100% for all uses except retail uses (62%) and for schools (24%).
<b>Cost/VMT =</b>	Net cost per vehicle mile traveled is \$157.44, which includes adjustments for double payment credit, debt service credits and federal/state funding credits

If the Office of Transportation Planning finds that the site data used to calculate the alternative facility fee is current, is based on full occupancy, is based on generally accepted transportation engineering practices and methodologies, and is carried out by a qualified transportation planner or engineer, the alternative facility fee shall be deemed the facility fee due and owed for the new construction.

# VIII. Raleigh Water

**Email:** publicutilityinfo@raleighnc.gov

**Phone:** 919-996-3245

Raleigh Water manages state-of-the-art facilities and provides clean drinking water and sanitary sewer treatment services to the City of Raleigh and six merger communities: Garner, Rolesville, Knightdale, Wake Forest, Wendell, and Zebulon. The City of Raleigh also provides wastewater treatment for the Towns of Middlesex and Clayton. As of FY 2020, approximately 600,000 people live in the contractual service area of 299 square miles. Source water supply is from Falls Lake located in the Neuse River watershed and from Lake Wheeler and Lake Benson, which are in the Swift Creek watershed. During FY 2020, the Utility received a reallocation of its water supply that increased the system's 50-year reliable yield to 97.4 million gallons per day.

The Dempsey Benton Water Treatment Plant is the newest water treatment facility constructed in 2010 with a peak capacity of 20 million gallons per day. Currently this facility is producing approximately 12 million gallons per day. The Benton plant is supplied by two City owned reservoirs that were constructed in the 1950s, Lake Wheeler and Lake Benson. These two reservoirs provide approximately 2.1 billion gallons of storage which provides a 50 year safe yield of approximately 13 million gallons per day. This is the reliable water supply we can expect in a 50 year drought.

The E.M. Johnson Water Treatment Plant was constructed in 1967 and currently has a peak capacity of 86 million gallons per day. The E.M. Johnson Plant is supplied by Falls Lake where Raleigh Water has a 20.3 billion gallon storage allocation. This storage provides a 50 year safe yield of 84.4 million gallons per day. Total water supplies are expected to provide adequate water until 2047 with an estimated service area population of just over 1 million.

Sanitary sewer is collected and delivered to one of three resource recovery facilities through the 2500 miles of sanitary sewer collection system piping and 120 pump stations that make up the collection system. The sanitary sewer is then treated to a high quality with a biological nutrient removal process followed by tertiary treatment and then ultimately discharged back to the Neuse River or reused by distributing back to customers for non-potable uses. The total combined treatment capacity is 80.2 million gallons per day and the system had no discharge violations.

Raleigh Water fees and charges are reviewed annually and adopted by City Council. Per policy, some fees are indexed based on an Engineering News-Record index (ENR). For FY23 the ENR annual change is 5.83% to ensure fees for services are increased by prevailing market factors. This process included an in-depth review of external influences such as new or revised regulations and internal factors related to staff realignments, process changes and adjustments to the time and effort associated with providing each service.

Official Schedule of Rates, Charges, and Rents for water, sewer and reuse water billed on or after July 1 of upcoming fiscal year regardless of the date of delivery of service, for the entire eligible service delivery areas (Reference Section 2-3001, Raleigh City Code).

Billing Services was broken out to reflect contract rates.

Hauled Waste Water fees were previously authorized in City Code (Reference Section 8-2121, Raleigh City Code) but are being included in the Raleigh Water Fee Schedule effective July 1, 2021.

## Building Valuation Data – FEBRUARY 2022

The International Code Council is pleased to provide the following Building Valuation Data (BVD) for its members. The BVD will be updated at six-month intervals, with the next update in August 2022. ICC strongly recommends that all jurisdictions and other interested parties actively evaluate and assess the impact of this BVD table before utilizing it in their current code enforcement related activities.

The BVD table provides the “average” construction costs per square foot, which can be used in determining permit fees for a jurisdiction. Permit fee schedules are addressed in Section 109.2 of the 2021 *International Building Code* (IBC) whereas Section 109.3 addresses building permit valuations. The permit fees can be established by using the BVD table and a Permit Fee Multiplier, which is based on the total construction value within the jurisdiction for the past year. The Square Foot Construction Cost table presents factors that reflect relative value of one construction classification/occupancy group to another so that more expensive construction is assessed greater permit fees than less expensive construction.

ICC has developed this data to aid jurisdictions in determining permit fees. It is important to note that while this BVD table does determine an estimated value of a building (i.e., Gross Area x Square Foot Construction Cost), this data is only intended to assist jurisdictions in determining their permit fees. This data table is not intended to be used as an estimating guide because the data only reflects average costs and is not representative of specific construction.

This degree of precision is sufficient for the intended purpose, which is to help establish permit fees so as to fund code compliance activities. This BVD table provides jurisdictions with a simplified way to determine the estimated value of a building that does not rely on the permit applicant to determine the cost of construction. Therefore, the bidding process for a particular job and other associated factors do not affect the value of a building for determining the permit fee. Whether a specific project is bid at a cost above or below the computed value of construction does not affect the permit fee because the cost of related code enforcement activities is not directly affected by the bid process and results.

### Building Valuation

The following building valuation data represents average valuations for most buildings. In conjunction with IBC Section 109.3, this data is offered as an aid for the building official to determine if the permit valuation is underestimated. Again it should be noted that, when using this data, these are “average” costs based on typical construction methods for each occupancy group and type of construction. The average costs

include foundation work, structural and nonstructural building components, electrical, plumbing, mechanical and interior finish material. The data is a national average and does not take into account any regional cost differences. As such, the use of Regional Cost Modifiers is subject to the authority having jurisdiction.

### Permit Fee Multiplier

Determine the Permit Fee Multiplier:

1. Based on historical records, determine the total annual construction value which has occurred within the jurisdiction for the past year.
2. Determine the percentage (%) of the building department budget expected to be provided by building permit revenue.
- 3.

$$\text{Permit Fee Multiplier} = \frac{\text{Bldg. Dept. Budget} \times (\%)}{\text{Total Annual Construction Value}}$$

### Example

The building department operates on a \$300,000 budget, and it expects to cover 75 percent of that from building permit fees. The total annual construction value which occurred within the jurisdiction in the previous year is \$30,000,000.

$$\text{Permit Fee Multiplier} = \frac{\$300,000 \times 75\%}{\$30,000,000} = 0.0075$$

### Permit Fee

The permit fee is determined using the building gross area, the Square Foot Construction Cost and the Permit Fee Multiplier.

$$\text{Permit Fee} = \text{Gross Area} \times \text{Square Foot Construction Cost} \times \text{Permit Fee Multiplier}$$

### Example

Type of Construction: IIB

Area: 1st story = 8,000 sq. ft.

2nd story = 8,000 sq. ft.

Height: 2 stories

Permit Fee Multiplier = 0.0075

Use Group: B

1. Gross area:  
Business = 2 stories x 8,000 sq. ft. = 16,000 sq. ft.
2. Square Foot Construction Cost:  
B/IIB = \$214.08/sq. ft.
3. Permit Fee:  
Business = 16,000 sq. ft. x \$214.08/sq. ft x 0.0075 = \$25,690

## Important Points

- The BVD is not intended to apply to alterations or repairs to existing buildings. Because the scope of alterations or repairs to an existing building varies so greatly, the Square Foot Construction Costs table does not reflect accurate values for that purpose. However, the Square Foot Construction Costs table can be used to determine the cost of an addition that is basically a stand-alone building which happens to be attached to an existing building. In the case of such additions, the only alterations to the existing building would involve the attachment of the addition to the existing building and the openings between the addition and the existing building.
- For purposes of establishing the Permit Fee Multiplier, the estimated total annual construction value for a given time period (1 year) is the sum of each building's value (Gross Area x Square Foot Construction Cost) for that time period (e.g., 1 year).
- The Square Foot Construction Cost does not include the price of the land on which the building is built. The Square Foot Construction Cost takes into account everything from foundation work to the roof structure and coverings but does not include the price of the land. The cost of the land does not affect the cost of related code enforcement activities and is not included in the Square Foot Construction Cost.
