

COVID-19

Laboratory testing sites

The Netcare Group. Providing YOU with the best and safest care

Risk assessment, screening and laboratory testing for COVID-19

The information below should give individuals a clear understanding of the process for risk assessment, screening and laboratory testing of patients, visitors, staff, doctors and other healthcare providers at Netcare facilities:

- **Risk assessment, screening and laboratory testing of ill individuals**

Persons who are ill are allowed access to the Netcare facility via the emergency department for risk assessment and screening. Thereafter the person will be clinically assessed by a doctor and laboratory testing for COVID-19 will subsequently be done if indicated.

- **Laboratory testing of persons sent by external doctors for COVID-19 laboratory testing at a Netcare Group facility**

Individuals who have been sent to a Netcare Group facility for COVID-19 laboratory testing by a doctor who is not practising at the Netcare Group facility will not be allowed access to the laboratories inside the Netcare facility, unless the person requires medical assistance. This brochure which contains a list of Ampath, Lancet and Pathcare laboratories will be made available to individuals not needing medical assistance, to guide them as to where they can have the testing done. In the case of the person needing medical assistance, they will be directed to the emergency department. No person with COVID-19 risk will be allowed into a Netcare facility for laboratory testing without having consulted a doctor first.

- **Risk assessment and screening of all persons wanting to enter a Netcare Group facility**

Visitors, staff, external service providers, doctors and other healthcare providers are being risk assessed at established points outside of Netcare Group hospitals, primary care centres and mental health facilities, prior to them entering the facility.
