## Glycemic Index (GI) Food Chart

Below you'll find the Glycemic Index (GI) of most common foods. As stated in our original article, your goal should be to eat low and medium GI foods, while staying away from high GI foods.

Please view the food chart of your choice below and the corresponding listings will follow. In general, here's how things are categorized:

- LOW glycemic foods: less than 55
- MEDIUM glycemic foods: 55-70
- HIGH glycemic foods: 70 or higher

For your convenience, we'll first begin with a listing of ALL major foods. Then, I've broken it down into low, medium and high GI foods.

Warmest Regards,

Dr. Sam Robbins
