UPWARD AND DOWNWARD ADJUSTMENTS TO PRIOR YEAR OBLIGATIONS

Overview

This guide is designed for those who:

- Prepare agency Financial and non-Financial statements;
- Audit the agency financial statements;
- Manage or provide service to participants in upward and downward adjustments
- Design and maintain computer systems for financial programs;
- Instruct others in basic accounting and reporting.

In order to understand and gain the most from this guide, users must have a working knowledge of the following:

- Budgetary and proprietary accounting, reporting, and terminology;
- The United States Standard General Ledger (USSGL) accounts for basic multiyear and annual appropriations, revolving fund and Special and Trust Funds
- The concepts of Federal credit program accounting and reporting, fund structures, and terminology.

Scenario Assumptions

Scenarios can vary depending on many variables. Below is clarifying guidance to assist in the identification of an upward or downward adjustment.

In general, the status of the appropriation (unexpired vs. expired) is not used as a basis for determining upward or downward adjustments. This scenario can be applied to annual, no year as well as multiple year appropriations. This scenario occurs as a two year multiyear appropriation.

The basis for determining whether a transaction should be classified as an upward or downward adjustment depends on the specific event and the fiscal year of the adjustment. Upward and downward adjustments are based strictly on dollar value adjustments. An error or mistake does not constitute an upward or downward adjustment. In addition, changes to the budget/accounting structure (i.e. object class, direct/reimbursable indicator, budget (cost) center, program, Federal/nonfederal indicator, vendor code, etc. [within a TAFS]) does not constitute an upward or downward adjustment. **Reference to OMB guidance Appendix F of OMB Circular No. A-11.**

Unexpired and Expired Phase TAS:

- Upward and downward adjustments occur in subsequent years (year two and later), year one and year two are unexpired. The upward or downward adjustments are to be recorded in year two if the original transaction occurred in year one.

UPWARD AND DOWNWARD ADJUSTMENTS TO PRIOR YEAR OBLIGATIONS

Recovery of prior year Obligations:

- During the expired phase the upward and downward adjustments occur in subsequent years (year two and later) when year one was unexpired and year two was expired whereby expired unobligated balances are available for upward adjustments of obligations (obligated or paid).

Unpaid:

- Upward and downward adjustments of prior year unpaid obligations occur in subsequent years (year two and later), even if year one and year two are unexpired.

Refunds of Prior Year Paid Obligations:

- Downward adjustments of prior year paid obligations should occur in subsequent years (year two and later). Original disbursement adjustments in year one (first year of disbursement) do not require a downward adjustment.

Prior Year Budgetary entries:

- All budgetary accounts with the GTAS domain value is X where applicable unless otherwise specified

The Chart of Accounts and beginning trial balance will be the same for all years, and the outstanding orders differently illustrated for each TAS Year. The scenario highlights events that occur during the second year of a two year appropriation as well as the third, fourth, and fifth year (expired) of the appropriation. The assumption is that funds have been apportioned and allotted through year five. Matching USSGL Section III Transaction Codes are shown at the end of the description and/or in the Table for each entry. Where necessary, a new transaction Code is proposed and shown in *italics*. This scenario does not include entries for cancellations.

Several blocks of Purchase Order numbers are used in the scenario. PO numbers falling in the range of 10 through 50 are used for Purchase Orders that were outstanding at the beginning of the first year. Purchase Order numbers 101, 102, 103, and 104 are used for transactions that occurred in Year two of the two year appropriations. No new PO's were incurred in Year two.

310700 Unexpended Appropriations - Used	4,000		
570000 Expended Appropriations		4,000	

9. An error was discovered recording PO#101 in Year 2. Purchase Order should have been recorded on line 2 versus Line 1 of contract. Additionally, the budget (cost) center and object class were incorrect in the budget/accounting structure. Based on the error no dollar value contract value changed. Therefore, this does not constitute a dollar value contract modification adjustment justifying an upward or downward adjustment of a prior year obligation.

<u>Proprietary Entry</u>			
None.			

UPWARD AND DOWNWARD ADJUSTMENTS TO PRIOR YEAR OBLIGATIONS

12. The \$80 dollar value contract modification adjustment was determined to be incorrect in Year 2 and should have only been a \$50 decrease to PO#30. No goods and services have been delivered. Post a reversal of the Downward Adjustments of Prior-Year Unpaid Undelivered Orders- Obligations, Recoveries (previously recorded in transaction 11, in Year 2).

Note: Even though there is a possibility of an abnormal balance in Year 2 with USSGL 487100, the documentation supporting the adjustment is the contract modification to Year 2, in this situation the GTAS prior year adjustment domain value is “P”.
