HealthcareSource eLearning Library℠

American Heart Association — life is why™

HeartCode BLS from the American Heart Association

LEARNING OBJECTIVES

After successfully completing the BLS Course, students should be able to:

- Describe the importance of high-quality CPR and its impact on survival

- Describe all of the steps of the Chain of Survival and apply the BLS concepts of the Chain of Survival

- Recognize the signs of someone needing CPR

- Perform high-quality CPR for adults, children, and infants

- Describe the importance of early use of an AED and demonstrate its use

- Provide effective ventilations by using a barrier device

- Describe the importance of team dynamics in multirescuer resuscitation and perform as an effective team member during multirescuer CPR

- Describe the technique for relief of foreign-body airway obstruction (choking) for adults and infants

The American Heart Association's new HeartCode® BLS Course provides the foundation for saving lives after cardiac arrest. Updated to reflect new science and education in the 2015 AHA Guidelines for CPR and ECC, this course, delivered right through HealthcareSource NetLearning® teaches basic life support skills for application in both in-facility and prehospital settings, with a focus on high-quality CPR, improvement of chest compression fraction, and high-performing team dynamics.

The AHA's new BLS Course offers:

- Content representing the latest resuscitation science for improved patient outcomes

- Realistic scenarios, simulations, and animations depicting rescuers, teams, and patients

- Course and content flexibility for AHA Instructors and students, including adaptability to local protocols

Learners who complete this course will receive 1.75 contact hours.

Course Specifications
The following are the specifications for HeartCode BLS:

- Includes in-facility and prehospital tracks; student chooses his/her track before starting HeartCode BLS modules

- Includes 10 modules, five eSimulations, and two video tutorials

- eSimulation cases include
    - Two adult two-rescuer BLS cases
    - One child one-rescuer BLS case
    - One infant two-rescuer BLS case
    - One infant one-rescuer BLS case

- Summary of critical concepts provided for each eSimulation case

- Virtual debriefings provided immediately after each eSimulation, with hyperlinks to the referenced section of the BLS Provider Manual

- Includes downloadable resources including Skills Testing Checklists and the AHA's Chains of Survival

- Provides online access to the BLS Provider Manual

- Multiple choice, 25-question exam to test cognitive knowledge

Why Deliver HeartCode BLS via NetLearning?

- No more managing course keys. Everything is tracked right within the LMS you already use every day, with learning records saved and accessible within the system.

- Free, one-on-one live sessions with our services team are available demonstrating best practices for managing HeartCode BLS through NetLearning.

- 24/7 customer support to troubleshoot or answer any questions you may have.

- HeartCode BLS files are Ready2Run in NetLearning — meaning seamless integration and full support from our services team.

- It's easy! Work with just one vendor for all your needs including implementation, technical support, billing, and more.

- Volume discounts available!

Offering HeartCode BLS online via NetLearning makes the instructor-led skills check easier too.
Through NetLearning, administrators can:

- Track attendance during the Instructor-led, psychomotor component.

- Check for learner certificates from the cognitive portion for learners enrolled in the Instructor-led component to ensure learners are taking the appropriate portions at the appropriate times.

- Identify the number of Instructors needed, based on the number of learners needing certification or recertification during any timeframe, and schedule them to attend. This can also help cut costs by helping administrators find optimal times to bring in outside Instructors.

- Send emails to Instructors to remind them of a class as well as provide classroom and roster data.

- Book classrooms and equipment the Instructor may need during the class.

And your learners love NetLearning too! With email reminders, updated "To Do" lists, one login to remember, and automatic enrollments when certifications are close to expiring, your learners can focus on their core duties.

THE VALUE OF BLENDED LEARNING

Delivering the cognitive portion of HeartCode BLS online provides your learners the ability to navigate the course in a self-directed manner, reaching students with varying learning styles and in different environments.

Blended learning provides:

- Logistical flexibility — Readily available 24/7, with blended learning you can efficiently train staff dispersed across multiple floors or even state lines!

- Access to information in multiple ways — Learning isn't "one size fits all." With dramatizations, eSimulations animations, and interactivity, online HeartCode BLS gives learners access to information in a way that works best for their needs.

DID YOU KNOW??

A recent article from the American Red Cross demonstrated that not only did learners prefer the blended CPR training format, but learners who completed the online programs outperformed their traditional classroom counterparts in all assessment categories.
