Shaft Grounding Kits

Shaft Grounding:

Shaft grounding is recommended (NEMA MG1 31.4.4.3) as an effective means of bearing protection for motors operated from inverter power. One grounding device is adequate to bleed down inverter-sourced shaft voltages, thereby protecting both bearings for motors as large as 6085 frame.

SGR Kit:

Kit includes grounding ring, adhesive mounting hardware and instructions (for domestic products only).

SGR Universal Kit:

Kit includes grounding ring, all mounting hardware needed to mount to any standard drive end bracket and instructions.

Shaft ground rings fit these NEMA shaft extension frames listed below, they are designed to mount on the shaft end. For larger frames, please contact Marathon Electric.
