

IMPORTANT Oil Filter Application Information

The Euro 6 vehicles listed on the next page **MUST BE FITTED** with the correct Oil filter Mahle OX171/2D1 or Mann HU7033z (Available Jan 2016*). This is due to the change in the Oil filter housing cap and seal for Euro 6 (PSA) DV6FC, DV6FD, DV6FE applications.

DO NOT under any circumstances use HU716/2x (or equivalent) Euro 4 / 5 filters for these Euro 6 vehicles. The housing cap seal will not provide adequate sealing; oil leakage and potential engine damage will occur.

The Applications in AlliCat are correct and list the unique oil filter part number for Euro 6 vehicles.

The images below show the differences with the housing seal (square profile vs round profile).

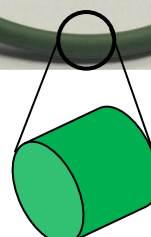

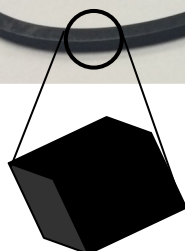

For Euro 4 and 5

Housing seal is black with square profile

For Euro 6 (PSA)

Housing seal is green with round profile
