

# INCREASE SECURITY, CONTROL, AND PRODUCTIVITY WITH EFFICIENT PULL PRINTING

---

## What if you could...

**Protect** documents and encrypt print jobs on their way to a device?

**Enhance** the security of networked printers by easily authenticating devices and users?

**Offer** print-reliant departments, and mobile or remote workers access to the features they need?

**Delete** unclaimed and obsolete jobs prior to printing—saving money and conserving resources?

---

## HP Access Control Secure Pull Printing Solution

Your business faces increased demand to address security, environmental, and cost-reduction objectives. At the same time, an increasingly mobile workforce requests the ability to print when and where they need to. Convenient pull-printing solutions and authentication methods can help increase security, and also help boost the productivity of your local, remote, and mobile workers.

HP Access Control Secure Pull Printing enables users to print to the network, and then retrieve jobs to any solution-enabled device. Pull printing virtually eliminates unclaimed documents, and increases the efficiency of mobile workers.

### Solution at a glance

Reinforce security, restore control, and reduce costs. HP Access Control Secure Pull Printing helps protect sensitive documents and secure printing environments—all while increasing convenience for local, mobile, and remote users. Lower costs and conserve resources by better managing printing environments. Reduce the amount of unclaimed print jobs and control access to networked devices. Give users the ability to retrieve jobs when and where they need to by simply accessing HP Access Control Secure Pull Printing-enabled networked device. Create the same user ability to access documents and print—no matter where they are.

### Solution features

**Deliver jobs to the right user, every time**—Store documents on your secure server hard drive, and give users the ability to authenticate to release their specific print job. The job remains in the queue until confirmed and released by the user, and is then printed on the spot—to any solution enabled device on the network.

**Authenticate with ease**—Set up simple user authentication directly at the device, using HP proximity card readers, alpha-numeric personal identification codes (PIC), personal identification number codes (PIN), or smartcards.

**Store and secure confidential documents**—Help ensure that only the user who sent the print job may retrieve it. Jobs can be encrypted both in transit and on the printer's secure hard drive. Even enable HP Access Control Secure Pull Printing without using a server.

**Streamline print queues**—Reduce the amount of managed print queues. Users can pull select print jobs directly and securely from device print queues—even use the “select all” button to print an entire set of documents.

Users send confidential documents to be printed.

Documents are stored on your secure server hard drive.

Users can authenticate with ease through a variety of methods.

Users can retrieve jobs when and where they need them.

## HP at work

A global telecommunications company had an uncontrolled print environment, and needed a more secure solution that also provided better mobility and flexibility to employees. HP Access Control Secure Pull Printing helped control output and access to devices through a single print queue. Employees could initiate printing virtually anywhere in the networked environment, and then collect print jobs at company-networked locations. Unclaimed print jobs were deleted from the queue after 72 hours, adding another level of security.

**Print from anywhere within your network**—Enable users to retrieve documents using a smartphone or other mobile device. The HP Access Control Mobile Release allows users to send a job to a specific queue, authenticate using a smartphone or mobile device, preview their job list, and then select and print it.

**Reduce costs and unclaimed jobs**—Establish policies that promote responsible printing practices, and help conserve paper and energy. Automatically delete unclaimed print jobs after a designated period of time.

### Why buy HP?

HP has the expertise to identify and integrate innovative solutions—for companies of any size—to help meet their complex business needs. As a global technology leader, HP offers financial stability and scale to improve IT value, enabling customers in major industries to become more cost-effective, efficient, secure, and sustainable.

### Get started

Contact your local HP representative to:

- Set up a workshop with HP to assess your specific business needs.
- Establish a plan to implement the best solution for today and into the future.
- Identify an environmental approach that can help your company save money.

## HP three-part approach

HP works with you to assess, deploy, and manage an imaging and printing environment tailored to meet your business needs, while helping you reduce costs, conserve resources, and simplify document-intensive processes. HP's three-part approach:

### Optimize infrastructure

HP can help you achieve a balance between your total cost of printing and your needs for user convenience and productivity.

### Manage environment

Working together, HP can help you maintain your optimized infrastructure while improving business efficiency and tightening security.

### Improve workflow

By streamlining your document-intensive processes, HP can help you deliver a more efficient environment for capturing, managing, and sharing information.
