The smart way to connect

Introducing Telkom Fibre!

Hi!

Thank you for showing interest in Telkom Fibre, powered by T Connect. Telkom Fibre is super-fast, reliable, and ensures that your data is transferred in the quickest time possible.

Fibre optic cables use light instead of electricity to carry a digital data signal so information is transferred at virtually an unlimited speed. Using light means that data transfers are not affected by electrical interference, making communications clearer and more reliable.

Benefits of Fibre:

- Super-fast internet, with speeds of up to 100Mbps
- Up to 50 times faster than a standard copper connection
- Get consistently fast speeds at home, for work or play
- Have the entire household online at the same time
- Make video calls over the network
- Fast downloads of HD movies, livestream HD video, and watch TV online
- More reliable than a standard copper connection

Fibre downloads at peak speeds of up to 100Mbps

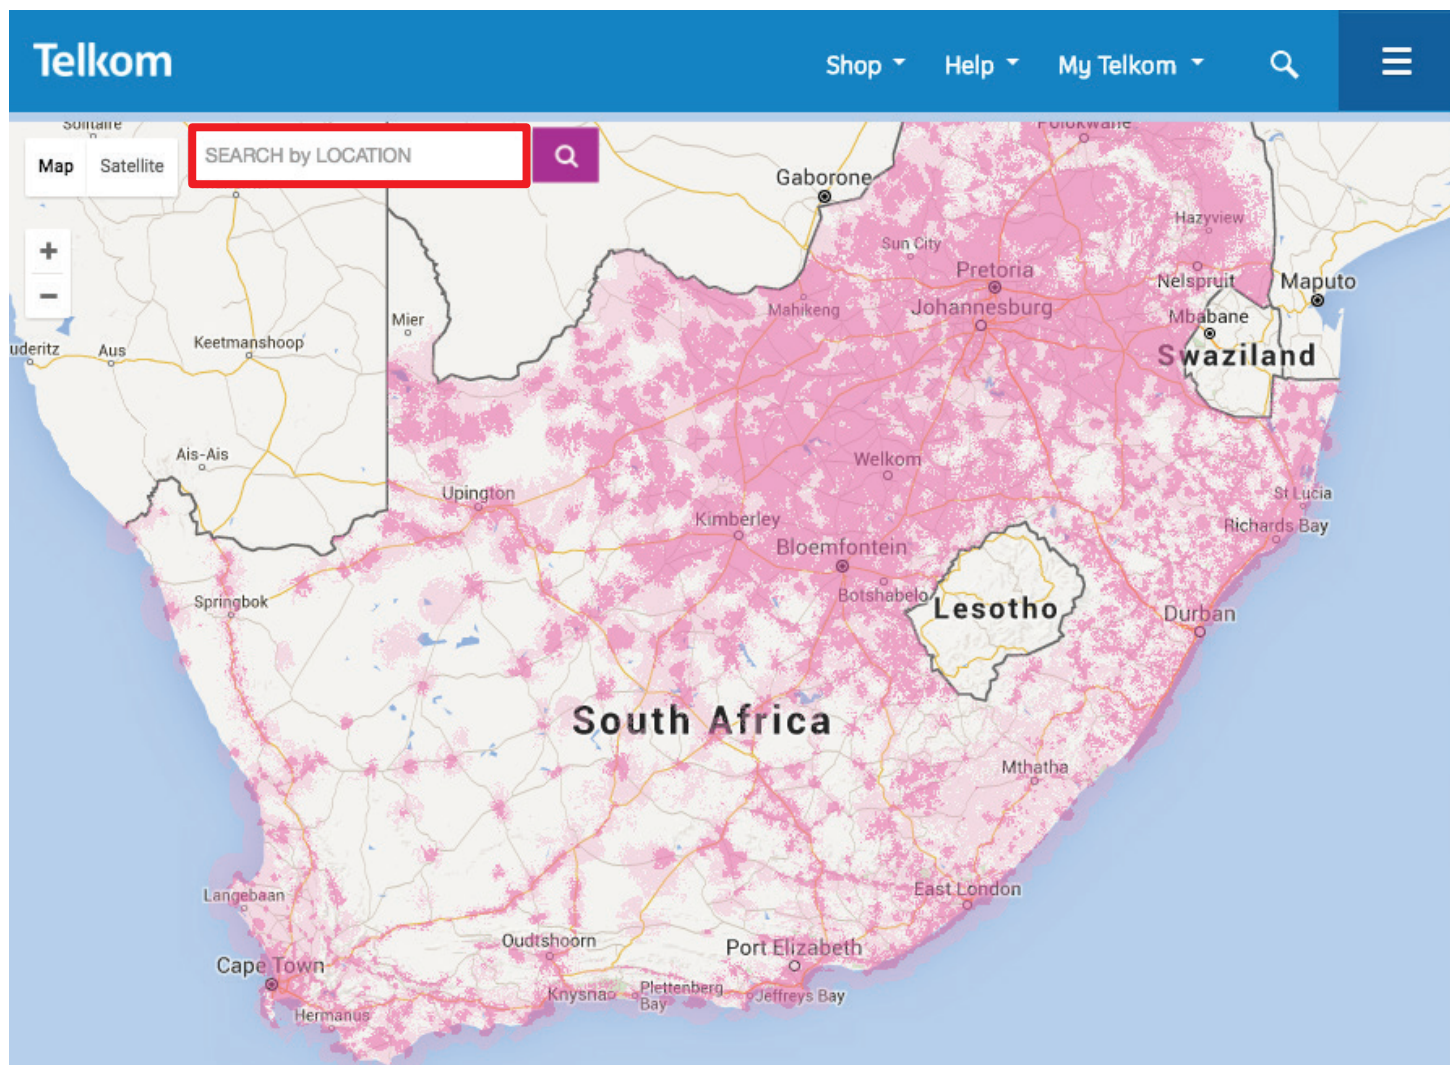

Comparing LTE, ADSL and Fibre

	ADSL	LTE	Fibre
Device required?	Yes	Yes	Yes
Mobile solution?	No	Yes	No
Voice and ADSL live required?	Yes	No	Yes
