Midwest Organic Grain and Feedstuffs Bi-Weekly Report

Agricultural Marketing Service

Livestock, Poultry, and Grain Market News

January 11, 2023

Current Midwest Drought Summary (January 3, 2023)

Widespread precipitation (1 to 3 inches) this past week led to a broad 1-category improvement across the middle Mississippi and Ohio River Valley. This recent heavier precipitation nearly eliminated 60-day precipitation deficits throughout Kentucky along with much of Illinois and Missouri. 90-day precipitation deficits are largest (more than 4 inches) across parts of Indiana and Ohio where broader moderate (D1) drought continues. Despite an increase in precipitation across Iowa during December, longer-term indicators continue to support D1+ drought. Since southern Minnesota received heavier precipitation after 7am ET January 3, this region will be evaluated for potential changes next week.
