

Penalties For Hospital Acquired Conditions

Medicare is penalizing hospitals with high rates of potentially avoidable mistakes that can harm patients, known as "hospital-acquired conditions." Penalized hospitals will have their Medicare payments reduced by 1 percent over the fiscal year that runs from October 2014 through September 2015. To determine penalties, Medicare ranked hospitals on a score of 1 to 10, with 10 being the worst, for three types of HACs. One is central-line associated bloodstream infections, or CLABSIs. The second is catheter-associated urinary tract infections, or CAUTIs. The final one, Serious Complications, is based on eight types of injuries, including blood clots, bed sores and falls. Hospitals with a Total HAC Score above 7 will be penalized.
