ADDED VALUE

Why Medline Standard Packs are Right for You

In addition to manufacturing a line of trays for the most commonly performed procedures, we know it's important to go beyond "standard" to provide the benefits you care about:

- **SAFETY FOCUS**
- **SUSTAINABILITY OPTIONS**
- **INNOVATIVE IDEAS**
- **INFORMATION SYSTEMS**
- **COST CONTROL**

SAFETY FOCUS

Medline has a full line of latex-free packs for peace of mind when it comes to latex-sensitive or allergic patients. We also carry sharps-free pack options since safety programs vary in preference. In addition, some of our packs feature Gold Standard safety products that were designed to help you address three important safety initiatives: avoidance of wrong-site surgery and needle stick injuries, as well as safe fluid management in the cath lab.

To learn more about Gold Standard products, please turn to Page 4.

SUSTAINABILITY OPTIONS

The greensmart™ line of surgical pack components offers environmentally preferred alternatives to some of the most common disposable supplies your facility uses. The added advantages include biodegradability, recyclability, energy conservation in manufacturing, and less waste sent to landfills.

To learn more about greensmart products, please turn to Page 6

INNOVATIVE IDEAS

Medline standard packs, though not color coded, still benefit from Medline's new EMPOWER™ Packaging program. All standard tray inserts have been redesigned to be more readable, intuitive, and provide more information at the time of procedure; eliminating wasted time, confusion, and uncertainty. Safety and convenience in a simple solution, just another reason why Medline standard packs are right for you.

INFORMATION SYSTEMS

Med-Pack, Medline's real-time pack-management tool, puts everything you want to know about your packs at your fingertips. We know that many hospitals use a mix of both standard and custom packs, and Med-Pack can help you manage both. For standard packs, you can view photographs of your packs and components and run standardization reports. For your custom packs, you can view, analyze, manage and more - easily and quickly.

To learn more about Med-Pack, please turn to Page 8.

COST CONTROL

You'll reap financial benefits by standardizing your facility's surgical packs. Inventory costs are lowered and the ordering process is streamlined because packs are always available. Set-up time is decreased because there is no need to open individual items. We manufacture in mass quantities to keep costs economical, and no contract is required to purchase standard surgical packs.

To learn more about our cost control measures, please turn to Page 9.

SAFETY FOCUS

Simple Solutions with Significant Impact

While our safety focus encompasses many areas, we'd like to spotlight our Gold Standard line — designed to set the “gold standard” for safety.

SAFETYGS02

GOLD STANDARD SAFETY BUNDLE II SAFETYGS02

Reminders, cues and process improvements can all be valuable in creating and maintaining a safe surgical environment. That's why we created our Gold Standard safety products. These vivid yellow pack components serve as visual reminders to keep safety top-of-mind. Because not all of our packs contain Gold Standard safety products, we also created a Gold Standard Safety Bundle that can be purchased separately and added to your protocol.

DYNJSF01GS

S.T.O.P.™ SAFETY FLAG DYNJSF01GS

The S.T.O.P. flag is a reminder tool that can be placed over the intended incision site after the patient has been draped. The brightly colored flag is designed to prompt the surgical team to perform their time-out verification. Once the time-out procedure has been completed, the S.T.O.P. flag can be removed and the surgical procedure may begin.

NC40FBRGS

NEEDLE COUNTER WITH BLADE GUARD NC40FBRGS

This needle counter has a built-in blade disarmer so the surgical team does not need to use a hemostat or other device to load and unload blades from a scalpel handle.

DYNJSPLASH1

SAFETY SPLASH BASIN WITH ABSORBENT PAD DYNJSPLASH1

Self-contained fluid management system holds biohazardous waste from cardiac catheterization and angiography procedures. The pad solidifies, eliminating the need to transport medical waste in liquid form and minimizing the risk of exposure for healthcare workers. It has a seal tight lid and a 500 ml capacity.

SAFETY FOCUS

DYNJTJA1GS

TRANSFER TRAY DYNJTJA2GS

- Stable neutral zone
- Provides for hands-free passing of sharp instruments, such as needles and blades
- Features an inner ridge for easy grasping
- Adhesive on the bottom for securing to the patient's drape, mayo stand or back table
- OSHA-compliant

DYNJBS01GS

SCALPEL HOLDER DYNJBS01GS

A protective holder in which to place sharp scalpels when they are not being used in the surgical procedure. Keeping the sharp edge in a down position will help prevent surgical team members from accidentally dragging their arms or hands across a sharp blade.

LBLSTNDGSM
(larger label)

LBLBLANKGSM
(small labels)

S.T.O.P.™ DUAL-TIP MARKER & PROMPTED LABELS W/SLEEVE LBLSTNDGSM/LBLBLANKGSM

The smear-resistant dual tips on our S.T.O.P. marker give you the flexibility to use it as a skin or utility marker. The triangular sleeve acts as a reminder to perform the time-out procedure and doubles as a ruler. The three-sided shape of the sleeve helps prevent the pen from rolling around.

NOTE: Time and date are no longer needed for surgical application since medications are used within a 24-hour time frame. Also note that pre-attaching labels to syringes, basins, bowls, med cups or other containers is not recommended by the Joint Commission.

¹ The Joint Commission. 2009 Hospital National Patient Safety Goals. Available at: http://www.jointcommission.org/PatientSafety/NationalPatientSafetyGoals/09_hap_npsgs.htm. Accessed April 1, 2009.

The prompted medication labels allow you to include the necessary information required for proper medication labeling on the surgical field.

Joint Commission requirements include¹:

- Full name
- Strength/dosage
- Initials

DYNJHOLD1 AND DYNJHOLD2

NON-MAGNETIC INSTRUMENT MAT DYNJHOLD1

Allows safe, quick access to instruments without the use of magnets

- Reusable which reduces waste
- Non-Slip backing helps prevent shifting over the surgical drape
- Medical grade silicone surface reduces the risk of instruments falling off the sterile field

SUSTAINABILITY OPTIONS

greensmart™

Company-wide, Medline has made great strides towards becoming a truly environmentally-conscientious manufacturer and distributor, and has many products available to help your facility achieve

its sustainability initiatives. Here, we want to focus on just some of the new greensmart™ components available in the Standard Pack line or as options for your custom trays.

NATURAL OR TOWEL Medline's exclusive patent-pending Natural OR towel was created without using dyes or bleaches, which results in a towel that is both more absorbent and less-linting, all while reducing chemical usage and energy required in manufacturing.

NATURAL HAND TOWEL OR hand-drying protocols do not necessitate the larger-sized towel that is often used. The new Medline Natural Hand Towel is 25 percent smaller, offering a reduction in resources and cost in addition to the already positive benefits a natural towel presents.

PIGMENT-FREE PLASTICS These bowls, basins, and trays are composed of the same plastic material and specifications that you have grown accustomed to, and are recyclable like their traditional counterparts. The only difference is that we have removed the pigment that gives them their color. This small change could account for a reduction of over 3 tons of the chemical each year if all Medline plastics could be converted!

ECODRAPE™ Medline's patent-pending EcoDrapes are the only eco-friendly surgical drapes available today. Made of more than 96 percent sustainably-sourced wood pulp, EcoDrapes are made without dyes, chemical binders and fluorochemicals. EcoDrapes will break down in less than six months in a landfill – polypropylene-based drapes take hundreds of years to break down. EcoDrapes meet the standard for flammability of clothing textiles (CPSC 16 CFR part 1610), and they offer the same performance and features as other Medline drapes; hook-and-loop line holders, large reinforcement zones,

greensmart PAPER TRAY These paper-based trays are recyclable and made of 100% sustainably-sourced wood pulp. They have been designed as an eco-friendly alternative to the foam pack stabilizers many standard and custom packs currently use. Their sturdy construction also features a water-based, bio-based barrier coating.

ECO BACK TABLE COVER

This back table cover utilizes the EcoDrape material to form the reinforcement zone, making this table cover over 40 percent bio-based. The film backing is the same polypropylene-based material currently used for other Standard Pack table covers.

INTRODUCING MEDLINE'S EMPOWER PACKAGING SYSTEM

Sophisticated Process, Simple Result

Medline designers together with our clinical team spent hundreds of hours in hospitals across the United States, observing and interviewing central supply managers, OR directors, nurses, scrub techs and others. Then we applied the principles of intuitive visual design to create an entirely new approach to packs: Medline's EMPOWER Packaging System.

From color-coding to high-legibility inserts, everything about Medline's EMPOWER Packaging System is designed to be so intuitive that its use feels almost effortless.

This user-centered system can be used to improve the ease, efficiency and safety of your surgical procedure packs.

POTENTIAL KEY BENEFITS:

- Increase the speed and efficiency of stocking and picking
- Reduce the risks of accidental latex exposure
- Support your hospital's lean OR objectives

SEE HOW MEDLINE'S EMPOWER PACKAGING SYSTEM CAN MAKE A DIFFERENCE IN YOUR HOSPITAL.

Contact your Medline representative to learn more about how Medline's EMPOWER Packaging System can transform your world. You'll never see packs the same again.

SAFETY CHECK

3 Circulator review: ☒ Check

Before Skin Incision

with at least nurse and assistant

Has the patient confirmed his/her procedure and consent? ☐ Yes ☐ No

Is the site marked? ☐ Yes ☐ No

Is the anesthesia machine and monitors checked complete? ☐ Yes ☐ No

Is the pulse oximeter on the patient functioning? ☐ Yes ☐ No

Does the patient have any allergies? ☐ No ☐ Yes, what kind?

Difficult airway or aspiration risk? ☐ Yes, and equipment/assistance

Risk of >500ml blood loss (Clot)? ☐ No ☐ Yes, and two blood bank fluids placed

Isolation Precautions check ☐ No what type?

This checklist is not intended to be Based on the WHO surgical safety checklist

Codes and Information

<R> Authorized Res. Without for this list only <T> Packaging contains latex

The packaging of this product contains natural rubber latex, which may cause allergic reactions. Sterilized by EO. Contents of the unopened, undamaged package are sterile. Do not re-sterilize.

Barcode: (01110080196183418)

A Closer Look

- 1 Highly legible alphabetized pack list lets you verify contents before opening pack
- 2 Clear expiration date
- 3 Latex items are noted in red – an almost impossible-to-overlook alert that helps prevent accidental exposure
- 4 Component utilization tool helps improve pack efficiency and eliminate waste by documenting unused items that may be eliminated, and additional separate sterile items that should be added to the pack.

MED-PACK

FROM MEDLINE INDUSTRIES

An interactive, real-time tool for surgical procedure pack management

Whether you're an OR director, materials manager or GPO administrator, Med-Pack places the information you need about your surgical packs right at your fingertips. The interactive program gives you the ability to identify various components contained in your custom and standard packs, perform safety analyses and make real-time modifications to your custom packs with a few simple mouse clicks.

Our goal was to make Med-Pack so intuitive that users would be up and running in minutes. The program consists of a series of icons called iViews. Each iView is a microsite, supplying data specific to your account. You can simply click on an icon to get the information you need, which eliminates the need to surf numerous Web sites to

track down relevant information, such as latex-free options and industry initiatives. Here are some of the most popular iViews.

COST CONTROL

Savings without Sacrifice

Managing a successful pack program is challenging, and you're often faced with tough decisions. If you choose to maximize patient care without taking expense into consideration, your costs will increase considerably. If you focus solely on the bottom line, you run the risk of compromising quality of care or encountering logistical bottlenecks.

Medline understands the financial challenges facing hospitals, and we believe that we provide a unique way to control costs. We do this without requiring you to compromise on quality or service or sacrificing the integrity of your pack program.

HOW DOES MEDLINE® CONTROL COSTS?

WITH A LEAN & EFFICIENT SUPPLY CHAIN

COMPONENTS

Robust purchasing power minimizes the cost of the components in our packs.

MANUFACTURING

Three strategically located manufacturing facilities provide unparalleled manufacturing, we then pass the savings these facilities create on to our customers.

STERILIZATION

Packs are sterilized in our dedicated facilities, eliminating the middleman and helping to keep costs low.

WAREHOUSING

To minimize shipping lead time and freight expense, we have 34 distribution centers in North America.

TRANSPORTATION

Our MedTrans fleet of trucks makes deliveries coast to coast, reducing shipping costs.

Protection you need.
Performance you demand.
Value you can afford.

Our standard packs feature drapes and gowns made from SMS medical fabric for increased barrier and strength. The Sirius® surgical gowns included in these packs are constructed of a four-layer SMS fabric using the latest technology.

Sirius® gowns provide a high level of fluid repellency, drapeability and softness along with hook and loop neck closures for easy adjustability.

PREMIUM DRAPE SAFETY FEATURES

HOOK AND LOOP LINE HOLDERS

keep surgical cords and lines clear of the fenestration.

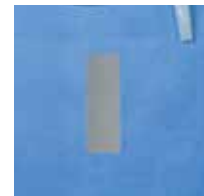

PREMIUM TAPE AND INCISE FILM
are used on all drapes.

LARGE IMPERVIOUS REINFORCEMENT ZONE

helps keep the area free of blood, body fluids and bacterial transmissions.

WIDE ANESTHESIA SCREENS

eliminate the need for additional drapes to cover the sterile field.

INSTRUMENT PADS

offer a convenient, non-slip area in which to place instruments during surgery.

PODIATRY

PODIATRY I: DYNJS0800

PODIATRY II: DYNJS0803

Core Supplies could be utilized for the following procedures:

Bunionectomy
 Hammertoe Correction
 Ankle surgery
 Toe Amputation
 Excision Soft Tissue Tumor of Foot
 Ankle arthroscopy

ORTHO

Extremity I: DYNJS0821

Extremity II: DYNJS3009

Extremity III: DYNJS0801

Extremity IV: DYNJS0804

Extremity V: DYNJS9804ECO

Extremity/Leg Fracture DYNJS3049

Core Supplies could be utilized for the following procedures:

ORIF Patella Fracture
 ORIF Ankle Fracture
 Achilles Tendon Repair
 Tibial Rodding
 Quadriceps Tendon Repair
 Below/Above the Knee Amputation
 Excision Tumors of Lower Extremity

MAJOR ORTHO SPLIT: DYNJS3010**Core Supplies could be utilized for the following procedures:**

Total Knee Replacement
 Total Hip Replacement
 Distal Femoral and Tibial Nailing
 Incision and Drainage Knee or Hip

TOTAL JOINT: DYNJS0830**Core Supplies could be utilized for the following procedures:**

Total Knee Replacement

TOTAL HIP: DYNJS3011**Core Supplies could be utilized for the following procedures:**

Total Hip Replacement (Primary and Revision)
 I and D of Hip
 Femoral Rodding

TOTAL KNEE:

DYNJS3013

Core Supplies could be utilized for the following procedures:

Total Knee Replacement (Primary and Revision)
 Incision and Drainage of Knee
 Replacement of Tibial Insert

HIP FRACTURE:

DYNJS3012

Core Supplies could be utilized for the following procedures:

ORIF Hip Fracture
 Hip Pinning

BILATERAL KNEE:

DYNJS3014

Core Supplies could be utilized for the following procedures:

Bilateral Total Knee Replacement

KNEE ARTHROSCOPY I:

DYNJ08333

Core Supplies could be utilized for the following procedures:

Knee Arthroscopy (using gravity for irrigation, not using machine)

KNEE ARTHROSCOPY III:

DYNJS0802

KNEE ARTHROSCOPY V:

DYNJS0815

Core Supplies could be utilized for the following procedures:

Knee Arthroscopy

KNEE ARTHROSCOPY III:

DYNJS0810

KNEE ARTHROSCOPY IV:

DYNJS0811

KNEE ARTHROSCOPY VI:

DYNJS0816

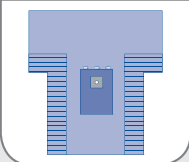

Core Supplies could be utilized for the following procedures:

Knee Arthroscopy
 Knee Arthroscopy with ACL/PCL Reconstruction
