Investment Information

Investment Objective & Strategy

The investment seeks long-term capital appreciation.

The fund invests mainly in U.S. stocks, with an emphasis on companies that are considered to have prospects for rapid earnings growth. It does not focus on companies of any particular size, however; the advisor may emphasize mid-cap stocks. The fund's investment advisor uses fundamental research to identify stocks that are expected to outperform the market over a three- to five-year time horizon and that are available at attractive prices relative to their fundamental values.

Category Description: Large Growth

Large-growth portfolios invest primarily in big U.S. companies that are projected to grow faster than other large-cap stocks. Stocks in the top 70% of the capitalization of the U.S. equity market are defined as large cap. Growth is defined based on fast growth (high growth rates for earnings, sales, book value, and cash flow) and high valuations (high price ratios and low dividend yields). Most of these portfolios focus on companies in rapidly expanding industries.

Volatility Analysis

In the past, this investment has shown a relatively moderate range of price fluctuations relative to other investments. This investment may experience larger or smaller price declines or price increases depending on market conditions. Some of this risk may be offset by owning other investments with different portfolio makeups or investment strategies.
